Subject: RE: Woburn Field Update - 7/30/10

The VIA sampling on the UniFirst property was completed today. The following wells were sampled:

S70S

UC29S

UC25

UC8

UC4

UC5

Yesterday I indicated that UC5 was dry. When the field team removed the bailer that was in the well it was full of water. They measured the water level immediately after removing the bailer and the well was dry. They check the well today and it had recovered sufficiently to collect a sample. No sample could be collected from Well S71S. The well only had 0.5 ft of water in it yesterday. The field crew bailed the well dry and it had not recovered sufficiently to collect a sample today. We will check it again at the end of the off-property VIA sampling. The sampling of the newly installed wells in the Dewey Ave. neighborhood will begin Monday morning.
